

How To Submit Your 2020 Excellence in Construction (EIC) Project:

- 1) Submit your Intent to Compete via the Weblink Registration Portal: [HERE](#)
- 2) You will receive a confirmation email on August 3rd with the link to setup your account with OpenWater. *(Follow Steps 3 – 8 on how to submit your Final Project)*
- 3) In OpenWater, you must select “Click here to submit your entries”, then you will be able to create a new account by registering your Name, Email and Company
- 4) Next, you will be brought to the **Application Page** (this is where you fill out all of the project details and select your category). When complete select Save & Finalize (this is NOT your project submission)
- 5) Select My Submissions – Here you will see your **Intent to Compete** as completed and **Submission Materials** will be “In Progress”
- 6) You will see a message that reads “Needs Attention”. Here you will find the Submission portal for your project. This will walk you step by step through the project submission process, following the [EIC Application & Guide](#) section by section. You can save throughout each section and go back to make edits during the process. Your project is not submitted until you click “Save & Finalize”
- 7) Once you select “Save & Finalize” you will **NOT** be allowed to go back and make any edits, additions or changes to your project submission

Important Dates to Remember:

July 31: Deadline to submit your Intent to Compete (via Weblink)

September 4: Deadline to submit your Project Entry (via OpenWater)

September 30: Pelican Chapter Winners Announced
